EX SERIES

EX Series Pin Loaded Machines Highlights

- 1 The high-quality carbon steel Q235 pipe is used as the main production material of the frame.
- 2 Using intelligent equipment such as laser cutting machine and integrated Processing station for precise machining.
- 3 Using unified Welded Robot with Professional Production Mode makes solder joint more precision, smooth and stronger.
- 5 Use the blasting sanding process to surface the instrument, and reduce the adhesion of the surface of the pipe to the lacquer surface.
- 6 Closed integrated electrostatic spraying line, automatic spray chamber control flow control system. the paint surface is flat and the adhesion is strong.
- 7 The equipment is pre-assembled and can only be packaged after passing the inspection.
- 8 Set up the equal adjustment equipment training function area.
- 9 Suitable for beginners and professional fitness trainer.
